

Potters Autumn Term Power Project– Under the Sea

This term Potters class are finding out about sea creatures and Oceans. We are learning about what lives under the sea and their features such as what they eat and what they look like. As part of our home learning this term, we would like the children to find out some facts and create a sea creature at home.

Research facts at :

<https://www.natgeokids.com/uk/discover/animals/sea-life/strange-sea-creatures/>

<https://www.thelearningapps.com/sea-creatures-for-kids/>

Year 1 children!

You can of course make a sea creature too! Additionally, as you have been finding out about plastic pollution in the Oceans, can you find out information about plastic pollution and how people are trying to reduce this? You could make a fact file, or create a poster about stopping plastic pollution. Remember how Rocket was determined to do something about the plastic on the beach? Be as creative as you like, ensure that you include lots of facts for us to read.

Sea Creature Make

Can you find out?

- What is the largest sea creature?
- What is the deadliest sea creature?
- Which is the largest Ocean?
- An interesting fact about seahorses.
- Which seas have colours in their names?

Please help your child to research these facts either online or in the library. Encourage your child to write their answers (copying your writing is fine at this stage!) and get them to present their homework creatively with stickers and/or drawings.

Our Power Project Museum will be held in school on Friday 17th December. Please only

bring projects into school on this day. Thank you.

woodley@crockerton.wilts.sch.uk

Using any junk/reclaimed materials at home, create your own sea creature! These don't need to be masterpieces – just have fun making them !
