

Explore the world:

- Tell us about a place you have visited on holiday. Use photos and drawings to explain what it was like there. Can you include a map to show where this was, either in the UK or abroad! What was the weather like there? Tell us about any food and different languages you may have experienced. Create a fact file that you can share with us about your memories and experiences.

Be Creative:

- What are your favourite animals or sea creatures? Can you make a model of an elephant or an octopus? Where do these animals live? Perhaps you could include a map to indicate this. Use reclaimed materials to create or models and enjoy making them with your family! Some ideas are shown below.

Potters' Power Project

Autumn Term – Where in the World?

Power Projects are an important way of extending and embedding pupils' learning and vocabulary. They also prepare children for future homework expectations. The pupils will share their learning on our 'school museum day' on **Wednesday 4th December**

No more than three pieces of work are expected. If you have any thoughts or questions, please pop in and see us or email: Mrs. Woodley woodley@crockerton.wilts.sch.uk

Values -Friendship and Compassion

- Make a collage showing friendship – this could be a heart, or holding hands.
- Can you find a poem about friendship that can be copied out and decorated?
- Can you find out about people in our community who help others? Draw a picture and ask an adult to write about what you know.

Explore your local area

- Go for a walk and notice what is familiar. Make a map with drawings of the places around your home. Is there a shop, park or swimming pool?
- If you visit Longleat, make a map of what you see and where the animals are in the park. Are there other features there that could be included on your map?

STEM Challenges:

- Design and make a boat big enough and strong enough, for one of your cuddly toys. You will need to measure your toy to make sure it fits! Find some materials that will be waterproof and able to float. Test the boat carrying your toy in the bath, and take some photos.
